Disclaimers

1. Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard.
2. Increasing the scanning resolution will limit the maximum possible scanning area
3. Preprocessing time is not included.
4. Color document scan speed is measured with ISO/IEC 24735 Annex C Test Chart A. Scan speed indicates the time measured between pressing the scan button of the scanner driver and the on-screen status display turns off. Scan speed may vary depending on system configuration, interface, software, scan mode settings and document size etc.
5. The performance of the printer may be reduced under certain temperature and humidity conditions.
6. For the temperature and humidity conditions of papers such as photo paper, refer to the paper's packaging or the supplied instructions.
